Proudly Kiwi owned  
& operated

# Wellness Water for your body

Every swim in an EcoSprings mineral pool is a rejuvenating and healthy experience due to the well-documented therapeutic effects of Magnesium on your skin and body.

## An innovation in Mineral Water Science for your Swimming Pool

EcoSprings Minerals is an exciting system inspired by the growing trend for pool owners to conserve precious water, reduce chemical usage, and swim in more natural, therapeutic water. The essence of the EcoSprings system lies within its patented blend of naturally occurring Magnesium and Potassium minerals sourced directly from the ocean. When properly balanced:

- ✓ EcoSprings water does not sting your eyes or leave dry salty residue on your skin.
- ✓ The taste is similar to that of distilled drinking water and there is no strong chlorine smell.
- ✓ EcoSprings water is a therapeutic blend of natural ocean minerals, providing you with the experience of a private health retreat in your own pool.

## Luxurious Water for Your Skin

The EcoSprings unique blend of patented minerals create superior, luxurious water, because it is so rich with minerals as opposed to large quantities of chlorine and salt which can be damaging to skin. Magnesium minerals soften the skin, refine pores and clarify water.

- ✓ Studies have suggested that absorbing Magnesium through the skin (transdermally) is one of the most effective ways for the body to maintain healthy levels of this essential mineral. By swimming in EcoSprings water, the Magnesium ions can be absorbed by your body through the skin.
- ✓ Magnesium is responsible for over 300 crucial enzyme reactions and cellular processes in the body. Magnesium shields our cells from heavy metals such as; aluminium, lead, and mercury, truly making this mineral a 'detox' therapy.
- ✓ Centuries of use in Eastern cultures have coined Magnesium as the 'Beautiful' and 'Miracle' mineral.

## Environmentally Friendly Water

The EcoSprings system is also a much more environmentally friendly option than a regular pool due to:

- ✓ EcoSprings' minerals do not contribute to environmental salinity. The natural mineral based water is extremely beneficial and kind to mother nature.
- ✓ EcoSprings' special filtration media, ecoKleen, can save up to 65% of your average backwash water consumption. This water, can be used to water your shrubs and lawns - because it's natural.

Ask one our friendly team members for more information on ecoKleen filtration media.

To find out about building or converting your pool to the EcoSprings Mineral System, speak to your local licensed builder or pool shop today, to start living a healthier lifestyle.
